COMPANY PORTFOLIO

WE BELIEVE IN WHAT WE DO. WE TRANSFORM.

Greenlam Industries Limited has been beautifying spaces for over two decades by infusing creativity into every piece of work and turning it into a masterpiece. A reliable name in surfacing products in more than 100 countries, Greenlam stands tall with its guiding philosophies, innovative technologies and creative solutions.

Greenlam has always been the pioneer in introducing the latest décor trends in India and international markets. Our strengths come from its product offerings, efficiencies in manufacturing, distribution network, brand equity and our young team of professionals.

We are the only integrated manufacturer in India to offer complete surfacing solutions with a vast product range of laminates, decorative veneers, engineered wood floors and doors with state of the art manufacturing facilities in Behror & Nalagarh, having the widest distribution network of over 12,000 distributors, dealers, and retailers across the country.

Decorative Laminates: Greenlam has earned the credentials of being Asia's largest and Worlds' third largest laminate producer.

Compact Laminates: Self sustainable compact laminate with thickness ranging from 4mm – 30mm. The perfect choice to build your ideal interior and exterior. While their sturdiness makes them apt for a wide range of applications, their spectacular colours make them more desirable.

Decorative Veneer: Greenlam owns the crown of being a no. 1 brand of Veneers – Decowood. We offer a range of exquisite handpicked veneers, sourced from across the globe to offer the best natural veneers.

Engineered Wood Floors: The 1st and only manufacturer in the country for the finest engineered wood floors under the brand called Mikasa.

Engineered Door Solutions: Under Greenlam portfolio, Mikasa is the first brand in the country to introduce factory finished doors and frames.

Go ahead; discover various design possibilities with our product portfolio.

WHAT MAKES GREENLAM THE BEST CHOICE?

PRODUCT DESCRIPTION

Laminates are surfacing materials which are pasted on a substrate like plywood/ MDF/ particle board. Greenlam High Pressure Laminates are made of specially selected decorative papers and absorbent kraft paper impregnated with melamine and phenolic resins. These are then pressed and hardened under heat and high pressure. Greenlam HPL's strong bonding makes them resistant to boiling water, stains and provides increased dimensional stability. Surface protection through special treatment makes Greenlam laminates scratch resistant. Available in over 1000 designs, 35 finishes and various sizes, these laminates create an aesthetic look and offer the customers a dynamic range to choose from. Give your interiors a mesmerizing look!

PRODUCT DESCRIPTION

Greenlam HD Gloss has been developed with the most advanced technology to create the best -in-class Gloss.

Resistant to MAR, scratches, scuff & abrasion, these premium laminates are sturdier & highly durable when compared to any other laminate & hence ideal for horizontal application.

Product Highlights:

- Superior micro scratch resistance
- Superior abrasion resistant
- Anti Bacterial
- Apt for Horizontal/ Vertical applications
- Wet heat tested
- Dry heat tested

ADVANTAGES

MAR Resistance - Greenlam HD Gloss Laminates gives excellent mar resistance thereby maintaining the gloss level three times longer than ordinary High Gloss laminate.

Abrasion Resistant - Greenlam HD Gloss Laminates gives 2 times better abrasion resistance than ordinary high gloss laminate. With over 800 revolutions as per the EN 438-2-10 test method, it is incredibly durable and sustains the beauty of laminates for long.

Gloss Level - The Gloss meter reading of Greenlam HD Gloss Laminates is over 112 when tested at 60° angle whereas other gloss laminates have 80 gloss meter reading when tested at 60° angle.

Impact Resistant - Special top layer along with the buildup gives better impact resistance thereby protecting the surface from falling objects. It is 100% safe to use in kitchen as it is non-toxic and non-porous.

Colour Fast - Colour is resistant to Xenon light.

Resistant to Heat - It can withstand a temperature of 180° C, making it ideal for use in kitchen applications.

Stain Resistant - It is resistant to stain and shows better results as compared to other high gloss laminates.

APPLICATIONS

- Office Furniture
- Kitchen
- Reception / Retail counters
- Restaurant / Bar area
- Wardrobe
- Door shutters
- Confernce room
- Walls panels / Display shelves

Greenlam

CHALK GRADE LAMINATE

PRODUCT DESCRIPTION

Greenlam Chalk-board has a special surface for easy erasure of standard writing chalk. It is made with decorative surface papers that are impregnated with melamine resins and pressed over kraft paper core sheets impregnated with phenolic resin. An assembly of these papers is then placed in a press and bonded under heat and pressure into a thermosetting plastic sheet. Finished sheets are trimmed and the backs sanded to facilitate bonding.

ADVANTAGES

- Chalk-boards are an excellent economic alternative writing board for schools
- The surface colour renders excellent contrast against chalk marks
- The special characteristics of Greenlam Chalk-board surface ensures perfect continuity in chalk marks for hassle free and readable writing

APPLICATIONS

- Conference Rooms
- Auditoriums
- Colleges
- Institutions.

MARKER LAMINATE

PRODUCT DESCRIPTION

The Marker board offers a surface perfect for markers suitable for schools, offices etc. These laminates turn spotless in a single wipe with no ghost effect and perform well for a long time, even at low maintenance. Greenlam Marker Board Laminate is made with decorative surface papers that are impregnated with melamine resins and pressed over kraft paper core sheets infused with phenolic resin. The melamine resin facilitates liquid chalk removal. Furthermore, it also has a special type of synthetic polymer which imparts excellent durability to surface with easy cleaning of dry erase marks or wet erase marks.

ADVANTAGES

- Largest range of design based on latest trends
- Easy cleaning for dry & wet erase marks

Greenlam

FIRE RETARDANT LAMINATE

PRODUCT DESCRIPTION

A result of extensive research and development, Greenlam Fire Retardant Laminates are safe, harmless, sturdy and come in exquisite designs and colours. They are treated with imported fire retardant chemicals that minimize smoke emission and delay the temperature rise, making it more resistant to fire and ill effects. The fire retardant chemical used is halogen free that eliminates the risk of toxic smoke. It's indeed a safe and recommended product for kitchens, cinema halls, malls etc., available in your choice of colour. Now you can, beautify your interiors, without compromising on safety.

ADVANTAGES

- Greenlam FR Grade Laminates meets requirement of specified fire tests conforming to BS 476
- Offer Class-I Fire Rating (Provided fire retardant adhesive and substrates are used)
- Class-I Fire Retardant Laminates do not allow fire to spread further, once the source is removed, and extinguishes itself within a stipulated time
- Eliminate the risk of toxic smoke

FEATURES

- Fire Resistant
- Abrasion Resistant
- Scratch Resistant
- Stain Resistant
- Crack Resistant

Greenlam

ANTISTATIC
LAMINATES

PRODUCT DESCRIPTION

We all have experienced the effects of static electricity when clothes stick together, hair keep standing up, and of course, the lightening effect. But, do you know that static electricity is a serious industrial problem estimated to cause more than $5 billion in damages annually. Greenlam proudly presents Antistatic Laminates - a ground-breaking laminate solution that provides a safe and better environment for furniture or other surface applications in electrostatic high-risk areas. Inbuilt with a futuristic technology and electrostatic charges consumption formula, these laminates drain out static charges and minimise the risk of sparking or damage to sensitive appliances. Also they repel the dust particles from accumulating on the surface, thereby maintaining a clean and healthy workspace.

ADVANTAGES

- Antistatic laminates are ideally suited for assembly, testing and manufacturing work surfaces or for any other application where highly effective electrostatic dissipative protection is needed
- Compared to conventional thermoplastics, this material exhibits excellent dimensional stability, along with having five times the stiffness of alternative materials
- Compared to coatings, the product provides a uniform thickness of protection across the entire material surface. In addition, the surface does not crack or chip
- Dust with different elements in laminates aggravates several health disorders like allergies, asthma, eyesores, fatigue etc. Antistatic laminates do not allow dust particles to accumulate on the surface, resulting in a clean and healthy work place

APPLICATIONS

- IT Offices
- Call Centres
- Laboratories
- Electronic Industries
- Pharmaceutical Labs
- Offices where electronic gadgets are regularly used
- EPA zones within working areas

Greenlam **COMPACT LAMINATE**

PRODUCT DESCRIPTION

Greenlam Compact Laminates are just the right choice for both horizontal and vertical applications where the surface should be functional, durable and also decorative, especially for Panelling, Lab furniture, Worktops, Modular restroom cubicles. Produced under strict process control parameters, they are available in various thicknesses (varying from 6mm to 30mm) and various sizes. And also come in a wide range of spectacular colours to suit your needs and tastes.

Decorative surface papers are first soaked in melamine resins. Next, they are pressed over kraft papercore sheets. These are then bound together with thermosetting resins, to be cured at a pressure of 17.5-21Mpa and temperature of 150° C. The finished sheets are finally trimmed and the Greenlam Compact Laminates are ready for use.

Sandwich Compacts – Compact Laminates are available in different layers of décor papers. Combination can be customized as per the requirement.

ADVANTAGES

- Exceptional self - supporting properties
- Greater dimensional stability & flatness
- Resistant to abrasion
- Resistant to water
- Resistant to fire
- Excellent hygiene properties
- Resistant to harmful chemicals & organic solvents
- Simple & quick assembly without the need for edging & adhesive
- In case of combustion, emits low amount of harmful gasses & fumes

FEATURES

- Non-toxic
- Does not rot, freeze or cultivate fungi, mildew or spores
- Decorated both sides, in a wide color/pattern range, to ensure flatness
- Easy to handle; it can be sawn, drilled, milled, shaped and threaded
- Self-supporting ensuring ease of installation and long term stability
- Quick and simple to install using aluminum moldings, mechanical fasteners or other purpose designed systems

PRODUCT DESCRIPTION

Factory made, ready to fit Door Solutions is an emerging category, which offers large potential for both residential and commercial construction.

Compared to current practice of mainly site fabrication and door frame fixing during wet construction – a 'solutions' approach involves manufacturing of door frames and door panels as a matched pair in factory and fixing at the point of use. This transition in both production process and method of fixing delivers far greater value to customers in terms of quality, life and overall aesthetics.

ADVANTAGES

- Factory fit & finish
- Matching aesthetics between door frame & door panel
- More sturdy and durable
- Factory-fitted hardware for smooth operation
- Best filler material bonder for greater rigidity, less distortion during monsoon
- Wide range in laminates and veneers

TECHNICAL DESCRIPTION

Best-in-class production equipment and machines

Available as Door Sets up to

4' Width and 10' Height

Door panel thickness - 44 mm and 38 mm

Matching frames in finger jointed solid wood with veneer

Wrapping

Fire retardant options available

Fixing with expandable foam and/or anchor fasteners

APPLICATION AREAS

- Bungalows and Villas
- High-rise apartments
- Hotels and Hospitals
- Offices and Factories

PRODUCT DESCRIPTION
